

TELVENT TO ACQUIRE CASETA TECHNOLOGIES, INC.

Houston, Texas, April 20, 2007 - Telvent GIT S.A. (NASDAQ: TLVT), the Global Real-Time IT Company, its subsidiary, Telvent Traffic North America Inc., and Caseta Technologies, Inc. announced today they have signed a stock purchase agreement whereby Telvent Traffic North America Inc., will acquire 100% of the shares of Caseta. Terms of the acquisition were not disclosed.

The acquisition of Caseta, an Austin, Texas-based company, combined with the acquisition of Farradyne in July 2006, further strengthens Telvent's position as a major supplier of electronic toll collection and intelligent transportation systems (ITS) in the United States, as well as globally. Caseta is engaged in the development, supply, integration and maintenance of electronic toll collection systems from the traffic lane to the back office. Its leading-edge electronic toll technology processes over 170 million toll transactions a year.

Over the next several years there will be a significant increase in the number of toll roads in the U.S. with new toll collection facilities aimed at minimizing customer inconvenience by using state of the art electronic free flow systems. As a result of the acquisition, Telvent will be able to offer a more complete electronic toll collection solution, including open road tolling functionality through its enriched technology platform and product portfolio.

Manuel Sánchez Ortega, Telvent's Chairman and Chief Executive Officer, said "Telvent's acquisition of Caseta is another step in our strategic plan to expand our transportation business in the world-wide market. This acquisition will help to consolidate our leadership in core geographies and sectors and complete our suite of traffic solutions offerings. Telvent and Caseta are highly complementary businesses, with strong portfolios of integrated product solutions and a shared commitment to customer service."

Glenn Deitiker, President of Caseta, said "The U.S. toll business is growing significantly as State Departments of Transportation and concessionaires join toll authorities in implementing leading edge solutions as a way to economically manage increasing traffic congestion. By joining with Telvent, a global technology leader with strong resources world-wide, the combined firm will be positioned to capture greater share in these growing markets and become a leading technology provider in electronic toll collection."

Upon the closing of the acquisition, which is expected to occur in April 2007, Caseta will become a wholly-owned subsidiary of Telvent Traffic North America, a U.S. company with offices in Rockville, Maryland, and Houston, Texas. Caseta's senior executive team will remain in their current positions providing day-to-day technology and operational leadership and continuity on all existing projects.

Telvent is being advised on the transaction by Boston Corporate Finance Inc. and Closa Corporate Finance Advisors, members of M&A International Inc. Caseta is being advised on the transaction by Craig-Hallum Capital Group LLC.

Forward Looking Statements
